SUMMARY

A passionate and Results-driven Full Stack Web Developer with a Master's degree in Computer Applications (MCA) and hands-on experience in designing and developing responsive web applications. Experienced in building scalable, user-centric solutions through academic and personal projects, with a strong understanding of software development principles and modern web technologies.

PROFESSIONAL EXPERIENCE

E-Tech Services Private Limited — Gurugram, Haryana, India (Remote) **Apr 2026 - May 2026**
Frontend Developer Intern

- Developed responsive and user-friendly UI components, ensuring smooth user experience.
- Collaborated with the development team to implement new features, resolve UI issues, optimize application performance, and deliver projects within deadlines.

TECHNICAL SKILLS & ADDITIONAL

Languages & Frontend: Java, Python | HTML, CSS, JavaScript, React, Tailwind CSS, Bootstrap
Infrastructure: Docker, CI/CD Pipeline.
Databases & Tools: MySQL, PostgreSQL, MongoDB, GitHub, Visual Studio Code.

PROJECTS

MR Reporting Software - React.js, Tailwind CSS, Spring Boot (Java), PostgreSQL **Feb 2026 – May 2026**

- Developed a role-based MR reporting system with Admin, MR, and Manager modules to streamline daily field activity tracking, including doctor visits, medicines promoted, and order details.
- Enabled real-time reporting and performance analysis through daily, weekly, and monthly insights, improving data accuracy, reducing manual errors, and supporting better decision-making.

EduPortal (University ERP System) – React.js, Tailwind CSS, Spring Boot, PostgreSQL

- Developed a role-based university ERP system to manage students, faculty, parents, and administrative workflows with features like attendance tracking, academic monitoring, and admission management.
- Automated key university processes with centralized data handling and real-time updates, improving efficiency, reducing manual work, and enhancing overall system usability.
